EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of the claims is the inclusion of "consisting essentially of" for the magnetized grains in all of the claims, in addition applicant's showing in the instant specification, particularly at Table 4, demonstrates unexpected results from the claimed restricted range of peak in intensities for ferrite film crystal lattice plane [222] and a crystal lattice plane [311] having I_{222}/I_{311} becoming smaller in value as the center line average surface roughness Ra of the substrate becomes larger and which peak intensity ratios I_{222}/I_{311} exceeds 0.05.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

The claims are 1 to 12, 14 and 41 to 50.

- All claims have been allowed.
